## Second-Quarter Business Highlights:

- Revenues from Information processing and software servicing fees increased from new client conversions and growth from existing SEI Wealth Platform<sup>SM</sup> (SWP) clients. Additional revenues from our acquisition of SEI Novus during the fourth-quarter 2021 also contributed to the increase.
- Revenues from Assets under management, administration, and distribution fees were flat. Revenues from Assets under management decreased due to the significant decline in market conditions during the second quarter and client shifts into lower fee investment products. This decline was offset by increased revenues from assets under administration.
- Our average assets under management in equity and fixed income programs, excluding LSV, decreased \$21.1 billion, or 11%, to \$177.1 billion in the second-quarter 2022, as compared to \$198.2 billion during the second-quarter 2021 (see attached Average Asset Balances schedules for further details).
- Our average assets under administration increased \$39.3 billion, or 5%, to \$897.5 billion in the second-quarter 2022, as compared to \$858.2 billion during the second-quarter 2021 (see attached Average Asset Balances schedules for further details).
- Net sales events in the Private Banks and Investment Managers segments during second-quarter 2022 were \$7.9 million and are expected to generate net annualized recurring revenues of approximately \$5.6 million when contract values are completely realized.
- Net sales events in asset management-related businesses of the Investment Advisors and Institutional Investors segments and the Asset Management Distribution (AMD) business in the Private Banks segment during second-quarter 2022 were \$934.0 thousand.
- The increase in operational expenses was primarily due to increased personnel costs due to business growth, competitive labor markets, and the impact of inflation on wages and services. The increase was partially offset by lower direct costs related to asset management revenues.
- In June, we initiated an enhanced voluntary separation program to long-tenured employees as part of our commitment to professional development and expanded responsibilities for current and new talent by increasing advancement opportunities. We expect this program to be finalized in July 2022. The program's total cost is currently estimated to be between \$54.0 million and \$58.0 million, which will be recorded as part of third-quarter 2022 results.
- Earnings from LSV decreased to \$29.8 million in the second-quarter 2022 as compared to \$35.1 million in the second-quarter 2021 due to negative cash flows from existing clients, market depreciation and client losses.
- We capitalized \$6.1 million of software development costs in second-quarter 2022 for continued enhancements to SWP. Amortization expense related to SWP was \$11.8 million in second-quarter 2022.
- Our effective tax rates were 23.1% in second-quarter 2022 and 22.3% in second-quarter 2021. The increase in the effective tax rate was primarily due to decreased tax benefits associated with a lower volume of stock option exercises.
- We repurchased 2.0 million shares of our common stock for \$109.3 million during the second-quarter 2022 at an average price of \$55.48 per share.
- Cash flow from operations was \$70.2 million, or \$0.51 per share, and free cash flow was \$52.4 million during the second-quarter 2022.
